CAMERON ACQUIRES GEOGRAPHE ENERGY PTY. LTD

HOUSTON (May 20, 2009) – Cameron (NYSE: CAM) has acquired Geographe Energy Pty. Limited, a leader in total valve management for the oil, gas, and mining industries in Australia and the Asia Pacific region. Geographe will become a part of Cameron's Valve & Measurement (V&M) group.

According to Scott Rowe, president of V&M's Process Valves division, which includes V&M's aftermarket operations, the acquisition is clearly a win-win situation for both Cameron and Geographe. "Cameron, through its CAMSERV™ Aftermarket Services brand, continues to expand its servicing solutions worldwide across all its oil and gas markets, including its valve business. The acquisition of Geographe, with their strong total valve management services market leadership, reputation for high quality work and their experienced, dedicated workforce, greatly strengthens this coverage in the Asia Pacific region."

Cameron's global network and resources bring opportunities for expansion of Geographe's proven total valve management service model beyond its current Asia Pacific service areas. Ian Criddle, Geographe's managing director, remarked, "Since our inception in 1996, we have positioned ourselves as a world-class, total valve service provider in our Asia Pacific service area and we have met that goal; we now look forward to taking those capabilities worldwide."

Cameron (NYSE: CAM) is a leading provider of flow equipment products, systems and services to worldwide oil, gas and process industries. Cameron's Valve & Measurement group designs, manufactures, markets and services a wide range of valves and measurement and control instrumentation used by those industries. More information on both Cameron and Geographe is available at www.c-a-m.com and www.geographe-energy.com.au.
